

BRIEF RECAP

Last time: Used data analytics to identify issues

Our solution: PAMPERS REFRESHED

Now: Conceptualize our solution

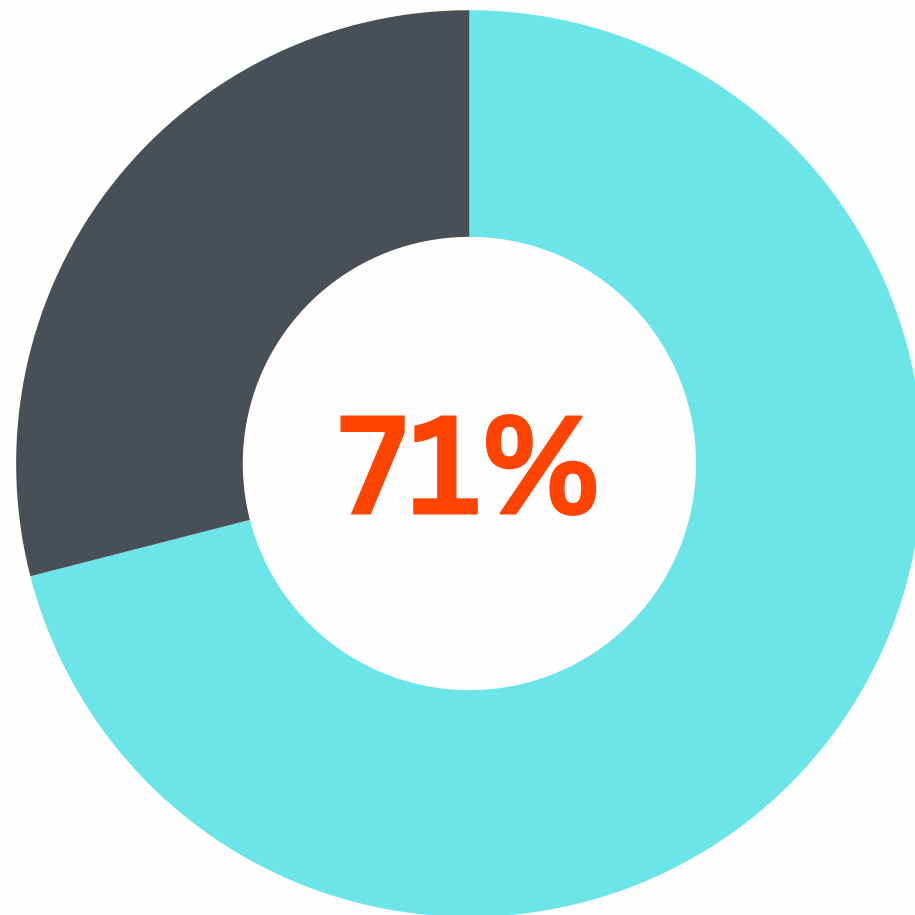

Problem to Process

Survey: Understanding customers

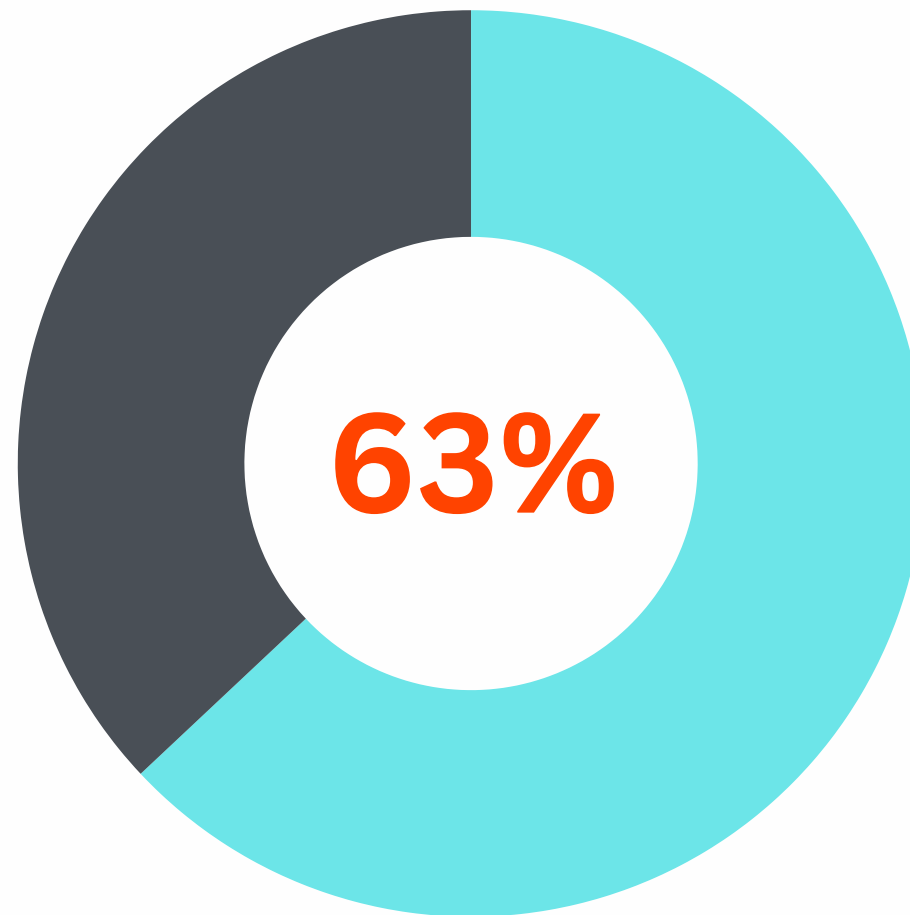

Digital Strategy: Strategic alignment of solution

Change Management: Analysis of areas of change

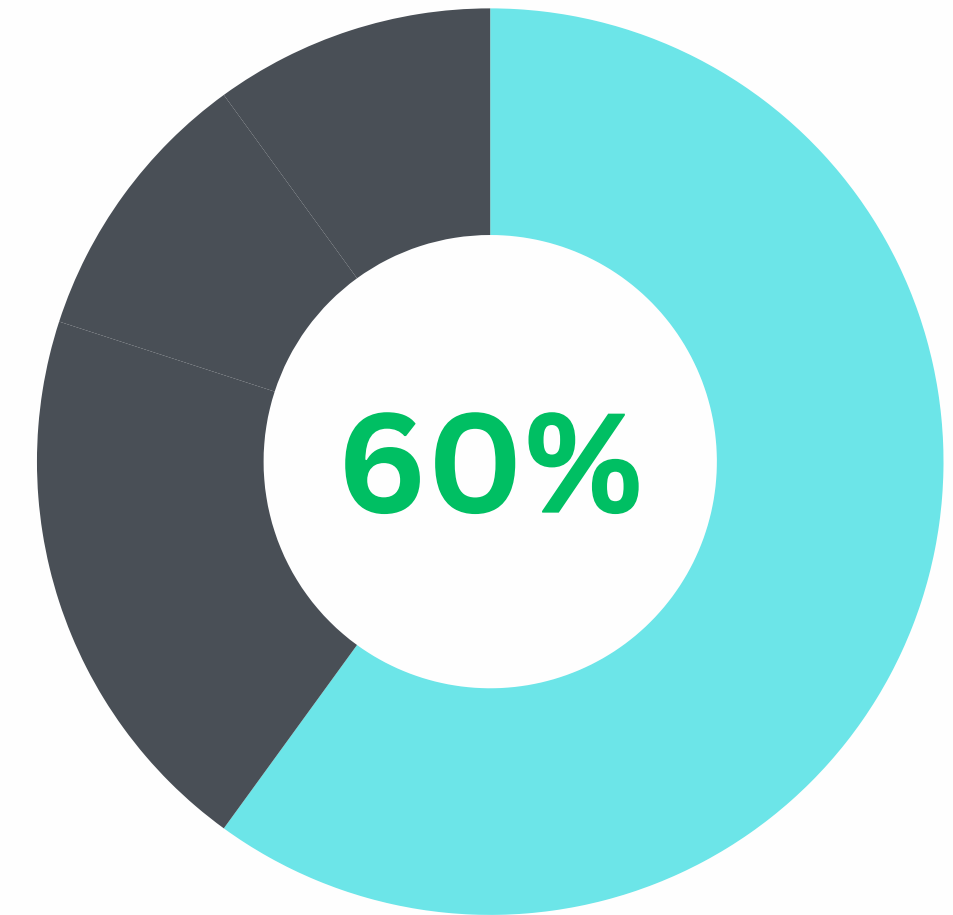

SURVEY RESULTS

71% have never scanned the QR Code on Pampers packages.

63% said they were not aware of Pampers parenting tools.

60% said they preferred Facebook for a parenting community.

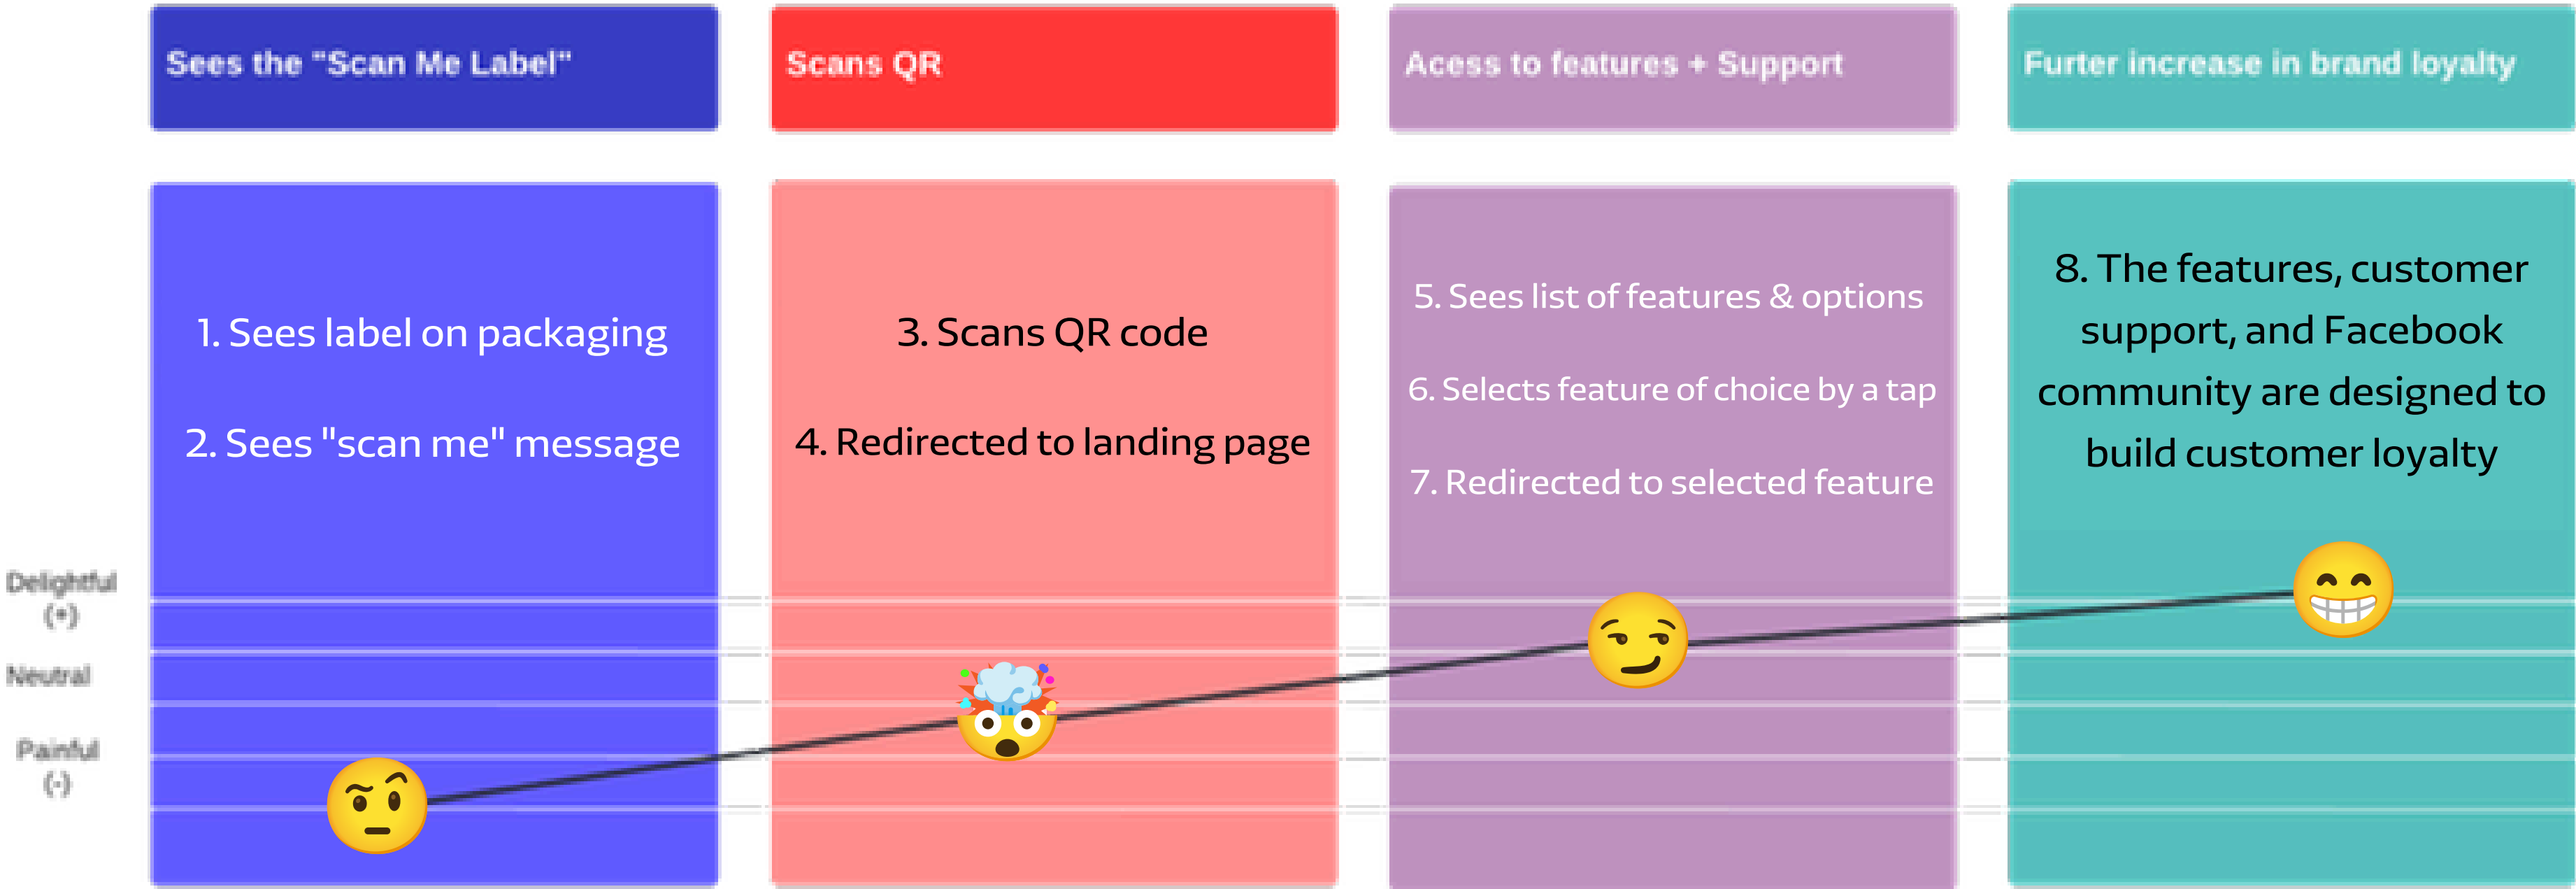

Expectations

Have a understanding brand that support parents by providing tools and to make their life easier

Scenario description

Go through the Pamper's landing page

Return on Investment (ROI) Calculations

[BACK](#)

IMPORTANT FIGURES

- Cost of Solution = 297,545
- Pampers Customer Lifespan = 2 years
- Pampers Market Share = 54%
- Pampers Profit Margin = 31%
- New UK Babies Every Year = 625,000
- Money spent on diapers and wet wipes per baby per year = £1,270
- Estimated Market Share Increase = 2%

$$625,000 \times 0.54 = 337,500 \text{ customers}$$

$$337,500 \times 0.02 = 6,750 \text{ new customers}$$

$$6,750 \times 1,270 = \text{£}8,572,500 \text{ per year}$$

$$8,572,500 \times 2 = 17,145,000 \text{ revenue}$$

$$17,145,000 \times 0.31 = 5,314,950 \text{ profit}$$

$$(5,314,950 - 297,545) / 297,545 = 16.9$$

ROI = 16.9

Competition 1 - Huggies

Competitor 2 - Moony

BACK ◀

- Parent Company: Unicharm
- Popular in Japan
- 2020 Revenue of Unicharm Personal Care Segment: \$5.74 billion

- Nature of change – Proactive
- Intensity of change – Adaptation
- Strategy of change – Economic + plan diagram
- Change Management Model – Kotter's

Technical Risk

- Website Design not User Friendly
- No Survey Assessing Website
- Dependency on a third-party software for Website
- Compatibility Issues with the Current Website Pampers Has
- Risk of Data Breaches and Personal Information Being Leaked
- Insecure transmissions of data over the internet
- Malware Infections could lead to data theft, data loss, and damage to the website
- Inadequate encryption of sensitive data such as passwords
- Poor website design
- Broken Links
- Sensitive Data Being Stored in the Website
- Terms & Conditions has to be signed by customer if data is being stored

Risk Identification Checklist 2

[BACK](#) ◀

Market Risk

- Rival companies might offer the same product
- Regulatory changes might occur increasing the cost for the website
- New Technological Advancements making the product undesirable
- Similar Products Currently Exist in the market, the demand for Pampers might be low
- Market is Highly Saturated

Business Risk

- Requires continuous effort to keep up the website
- Financial Risk due to both the launching cost and the maintaining cost for the website
- Operational Risk in problems delivering the product
- Reputation Risk if the website is used in other ways it's not supposed to be used in
- Failure to comply with privacy regulations, consumer protection Laws requires extra legal assistance with the development of a new product

Risk Identification Checklist 3

BACK ◀

Human Risk

- Issues whilst maintaining the website
- Customers using the forum might have bad intentions
- Phishing Attacks leading customers to release sensitive data to third parties with the website
- Employees managing the website have to be trustworthy

Project Management Risks

- Low Experience in Cost Analysis
- Effort greater than expected
- Group Roles Have not been clearly identified
- Low Experience in Business Analysis
- Short of time for learning and developing the project requiring extra effort from team members

Resource Risks

- Issues with Cost as launching a website is expensive
- Hiring Risks as employees to maintain the website might not be available
- Website training for staff is required

Risk Assessment Matrix – Technical Risks

[BACK](#)

Type of Risk	Likelihood	Consequences	Risk (Likelihood x Consequence)
Website Design not User Friendly	1	3	1x3=3(Low)
Dependency on a Third Party Software for Website, can cause crashes	2	3	2x3=6 (Moderate)
Compatibility Issues with the Current Website Pampers Has	1	5	1x5=5 (Moderate)
Risk of Data Breaches and Personal Information Being Leaked	2	5	2x5=10 (High)
Malware Infections could lead to data theft, data loss, and damage to the website	1	5	1x5=5 (Moderate)
Inadequate encryption of sensitive data such as passwords	1	5	1x5=5 (Moderate)
Broken Links	1	5	1x5=5 (Moderate)

Risk Assessment Matrix – Market Risks

[BACK](#)

Type of Risk	Likelihood	Consequences	Risk
Rival companies might offer the same product	5	2	5x2=10 (High)
Regulatory changes might occur increasing the cost for the website	2	3	3x2=6 (Moderate)
New Technological Advancements making the product undesirable	1	3	1x3=3 (Low)
Similar Products Currently Exist in the market, the demand for Pampers might be low	2	3	2x3=6 (Moderate)

Risk Assessment Matrix – Business Risks

[BACK](#)

Type of Risk	Likelihood	Consequences	Risk
Financial Risk due to both the launching cost and the maintaining cost	3	2	$3 \times 2 = 6$ (Moderate)
Operational Risk in problems delivering the product	1	2	$1 \times 2 = 2$ (Low)
Reputation Risk if the website is used in other ways it's not supposed to be used in	2	5	$2 \times 5 = 10$ (High)
Failure to comply with privacy regulations, consumer protection Laws requires extra legal assistance	1	5	$1 \times 5 = 5$ (Moderate)

Risk Assessment Matrix – Human Risks

[BACK](#)

Type of Risk	Likelihood	Consequences	Risk
Issues whilst maintaining/developing the website	1	4	1x4=4 (Moderate)
Phishing Attacks leading customers to release sensitive data to third parties with the website	2	5	2x5=10 (High)
Employees managing the website might be unreliable/not trust-worthy	1	5	1x5=5 (Moderate)
Trolls on the internet might make the blog unsafe	2	5	2x5=10 (High)

Risk Assessment Matrix – Project Management Risks

[BACK](#)

Type of Risk	Likelihood	Consequences	Risk
Low Experience in Cost Analysis by the Project Team	2	5	2x5=10 (High)
Effort greater than expected for project	3	3	3x3=9 (High)
Group Roles Have not been clearly identified	2	2	2x2=4 (Moderate)
Short of time for learning and developing the project requiring extra effort from team members	2	4	2x4=8 (Moderate)

Risk Assessment Matrix – Resource Risks

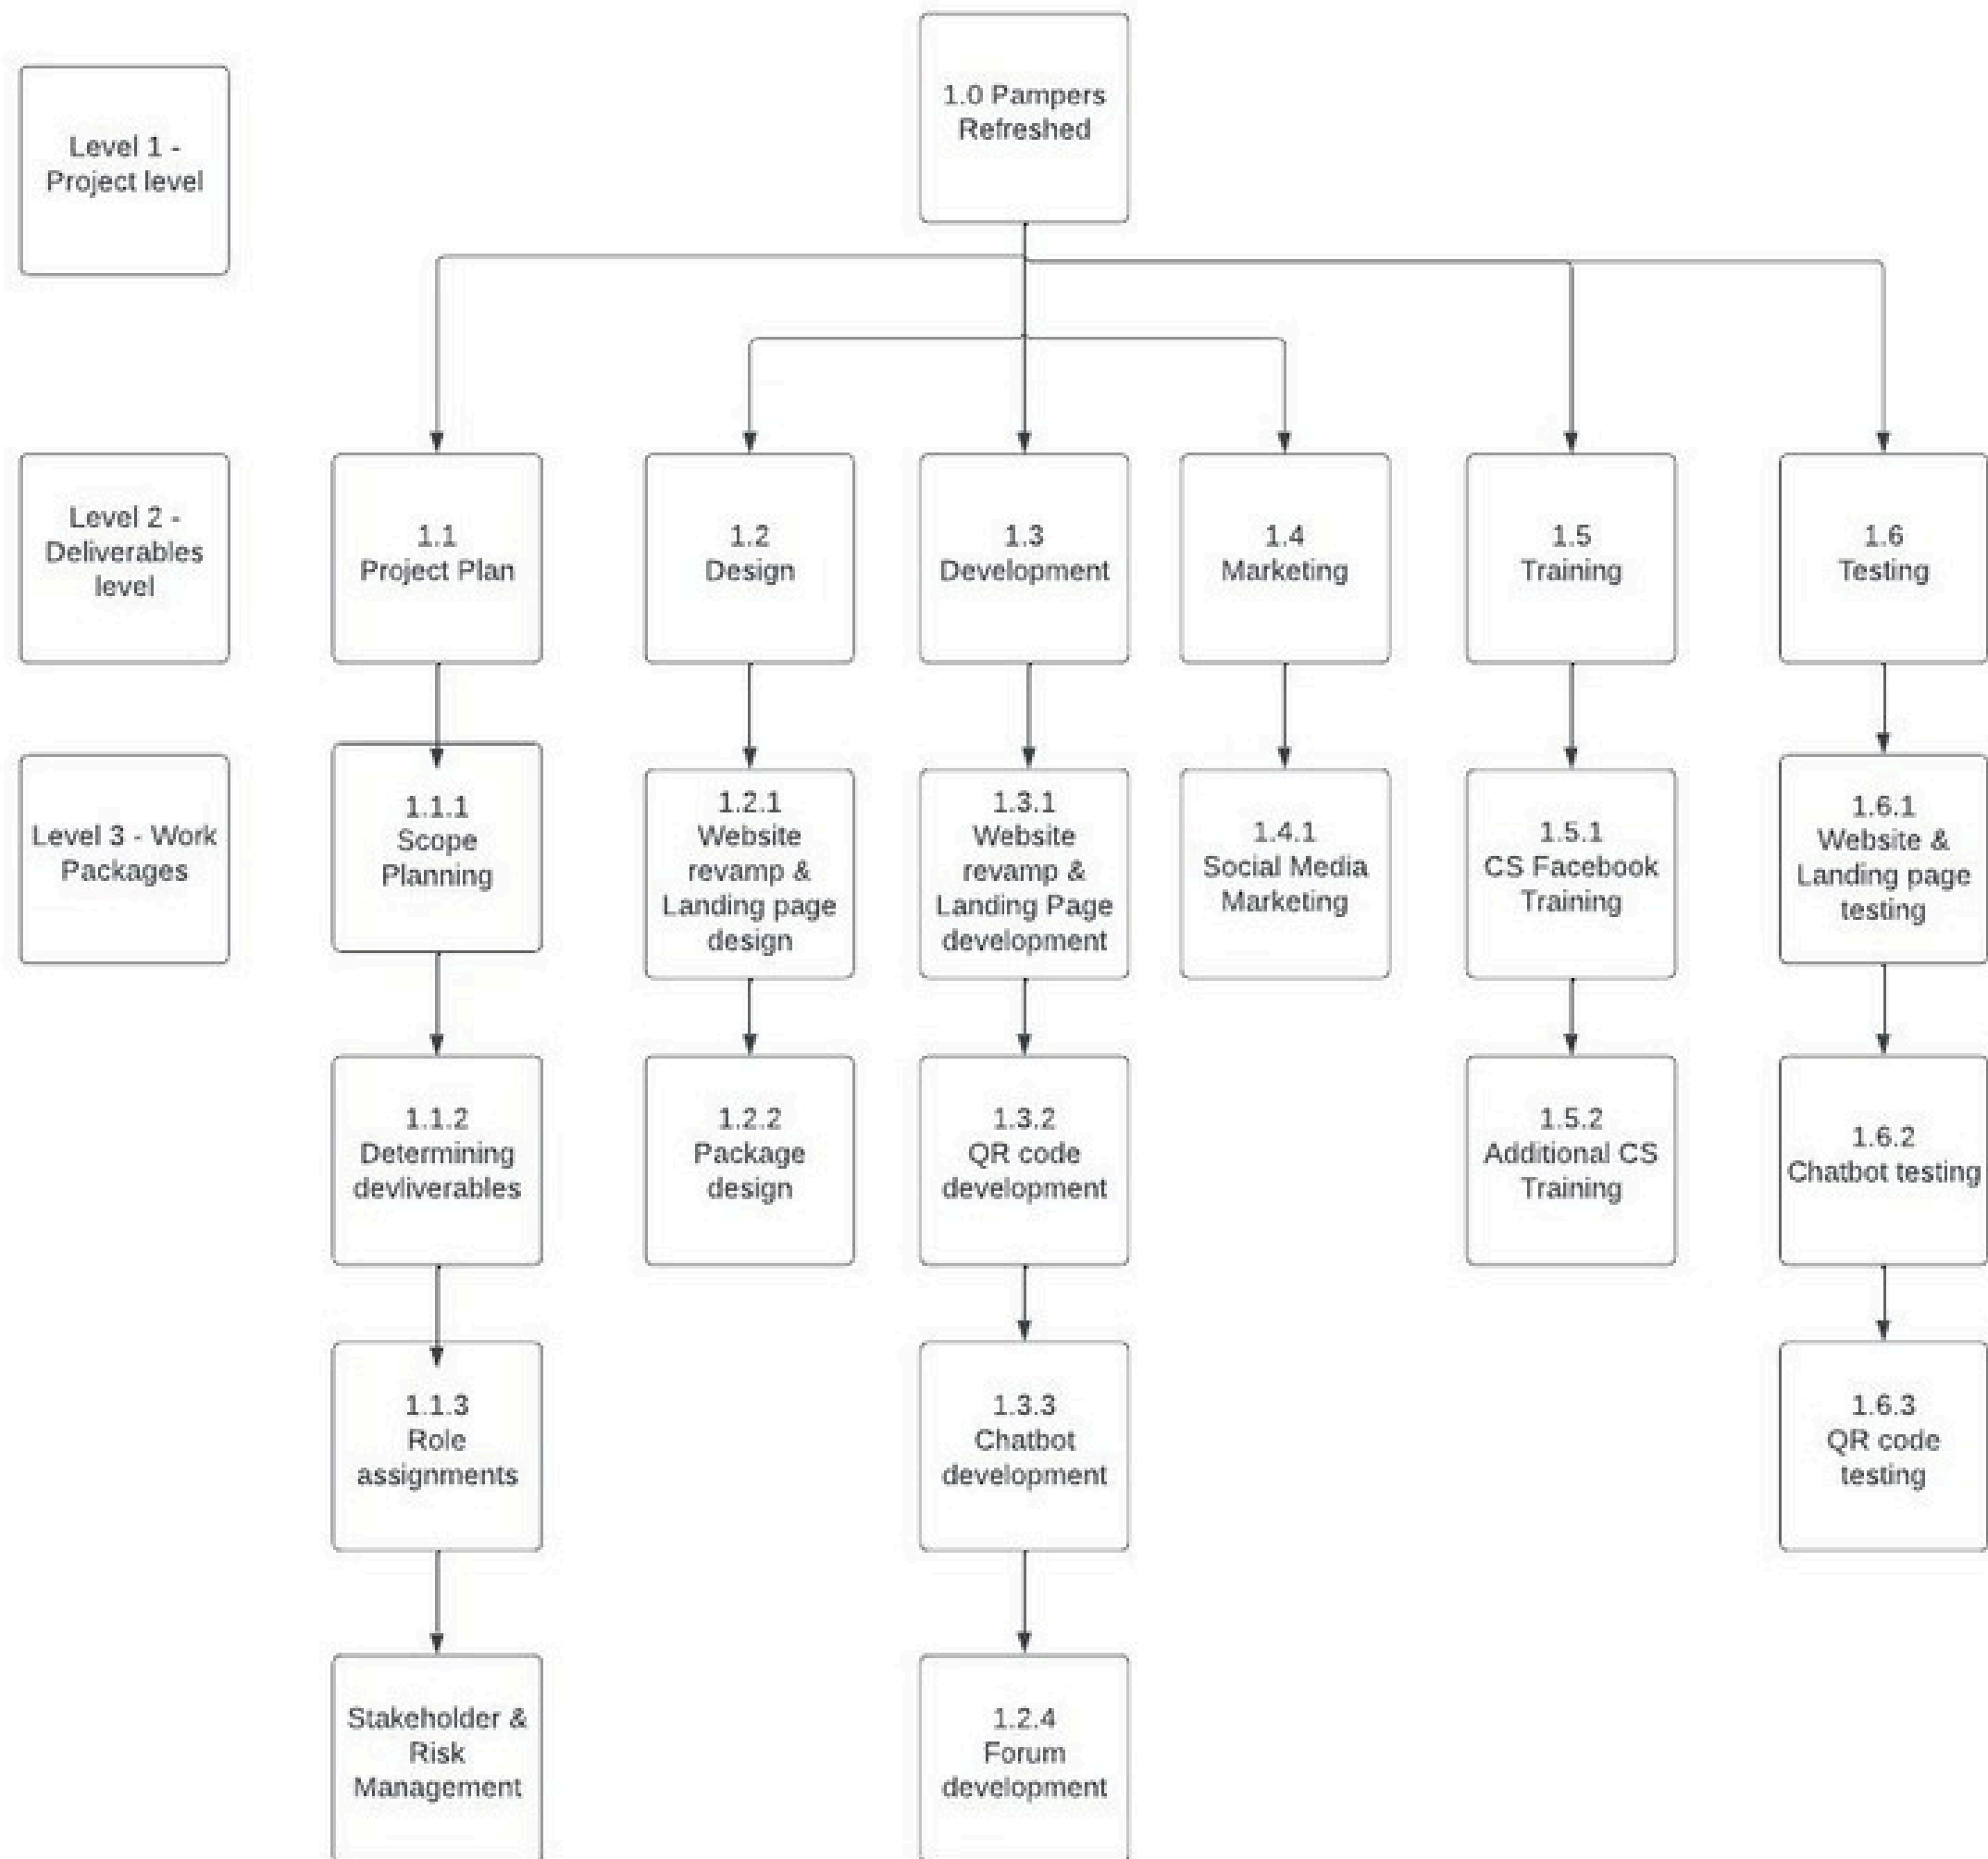

[BACK](#)

Type of Risk	Likelihood	Consequences	Risk
Issues with Cost as launching a website is expensive	1	3	$1 \times 3 = 3$ (Low)
Hiring Risks as employees to maintain the website might not be available	1	4	$1 \times 4 = 4$ (Moderate)
Website training for staff is required	1	3	$1 \times 3 = 3$ (Low)
There's a maintenance cost with the website and the parents forum (moderator etc)	2	2	$2 \times 2 = 4$ (Moderate)
